

SEASON 2 EVERFROST ERA GUIDE

Intro:

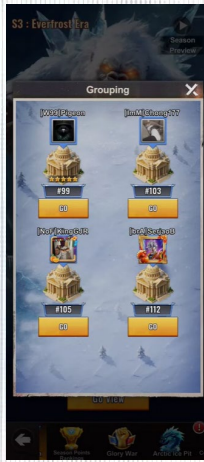

I wanted to make this guide for Server 261 and 36C to possibly help them have a reference guide when starting out their Season 2/3 Journey. This is a culmination of videos, countless references online and first hand knowledge from early servers.

There are countless people who have helped me along this journey to be able to write something like this let alone understand how to play this game. Tater, Sumo, Kurty(Sneaky MF), Osama, Titan, Mrs. Titan, Biti are just to name a few. I wanted to give a special shout out to PK who set me on a path of better understanding the politics of the game and not just click buttons. I truly enjoy being a part of the leadership of this server and hope that I bring others laughter and joy from my gameplay. See you on the battlefield!

Early Season Strategy

Pro Tip #1: First week Season 2/3. Start killing highest level Frostbane and Snow Leopards 30 times a day so that you gain Frost Core. Start your greenhouse and level it quickly using Frost Core. Spend \$40 on Wartime Pass by buying all four at one time, if possible, to gain extra Resources bonuses. Keep killing and leveling BioLab/GreenHouses until other events unlock.

Seasonal Group Pairing

New to Season 2/3 is Seasonal Group Pairing. Your alliance will be grouped with three other servers to create a four-state season group. You will be able to attack cross state and fight for seasonal objectives during the season.

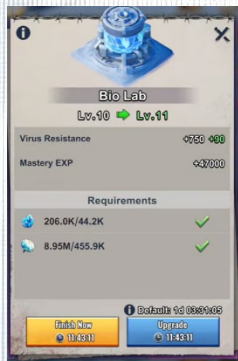

Virus Resistance

Virus Resistance determines what level of NPC you can kill. Resistance is increased by leveling your BioLab and other items in the game. The quicker the buildings are upgraded, the more resistance you get. The more resistance you have the higher the Snow Leopard/Frostbane you can kill. The higher the Snow Leopard/Frostbane level, the more Resources you get.

Buildings

Pro Tip #2: Biolabs at level 26 added with Support Mastery will give you enough resistance to defeat the highest level Frostbanes. You will want to wait until Biolab level 28 before switching to Combat due to the loss of the resistance buff from Support Mastery.

Biolabs

Smart Greenhouses

Ice Bloom  and Frost Cores  are required to level up your seasonal buildings.

You start with a Biolab. The Biolab gives you immediate resistance to kill low level NPC's in the game. If possible, purchase the Wartime Investment x4 (\$40 investment) to gain Seasonal Resources quicker. You can buy these back-to-back. This will allow you to get the Smart Greenhouse quicker, allowing you to grow Ice Bloom to start upgrading buildings.

Summary:

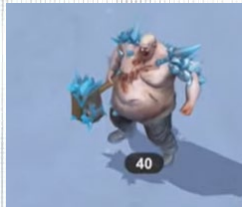

1. Kill Snow Leopards and Frostbanes (30 times per day) to get Frost Cores.
2. Use Frost Cores to upgrade your Greenhouse, this increases Ice Bloom Output/hour.
3. Use Ice Blooms from your Greenhouse to upgrade Biolab and Greenhouse buildings.
4. Only upgrade Biolabs and Greenhouses to reach maximum level NPC's. Upgrade other buildings once resources are plentiful.
5. For F2P players, if you are having a hard time killing higher level NPC's then start upgrading your other buildings to gain more power.

Frostbane, Snow Leopards and FuryLord

Pro Tip #3: Don't immediately start killing Snow Leopards and Frostbanes after reset IF your Biolab will be done upgrading **that day**. Wait until you can finish the Biolab that day and then kill higher level NPC's for better rewards. Make sure you kill your max amount before reset though.

Pro Tip #4: Snow Leopards drain your attempts just like Frostbanes do but only give half the rewards. Kill Snow Leopards only when you finish all your attempts on Frostbanes.

Frostbane(Boomer)

Snow Leopard(Zombie)

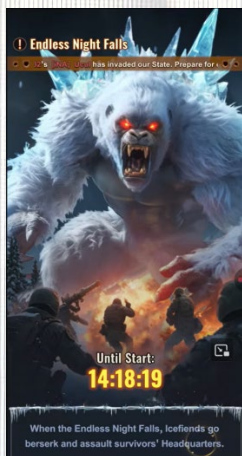

FuryLord

Frostbane and Snow Leopard rewards include Snowflakes, Frost Cores and other resources. Higher level Frostbanes and Snow Leopards grant more Snowflakes, Frost Cores and resources. In the beginning, watch your resistance and determine whether you are better to use rallies against boomers or can kill the Snow Leopard solo. FuryLord works the same as in Season 2. He just looks way cooler.

Endless Night Falls Event

Hunter Yetis(Levels up to 200)

Pro Tip #5: Set Rallies to 10 minutes or even 30 minutes to guarantee marches are full. Level 200 Yeti's are strong.

Pro Tip #6: If you are targeted by a Yeti, you can dodge and reset his target by creating a rally to attack him then cancel it. This will reset the attack and direct him elsewhere.

Pro Tip #7: Try searching for level 180-200 Yeti's. The kills are limited daily so don't waste them on lower levels.

Yeti Zoom Out on Map

Yeti Zoomed In on Map

Hunter Yeti's provide seasonal rewards including Snowballs, BP, and resources. You can defeat Yeti's twice per day except for Sundays. On Sunday, you can defeat it five times, giving you additional rewards. Higher level Yeti provides more resources. Virus resistance doesn't matters here. Rally these guys with main marches at higher levels.

When you are searching for Yetis, if its HP has already dropped below 100%, try to avoid it. This could be another alliance coming back to hit it after a first attempt but got defeated. More powerful alliances will be able one-shot them. Look for full HP Yeti's to hit or post in leaders chat if anyone is attacking. During the weekend higher level Yeti's will appear.

Glacier Kongs(Levels 310-350)

Glacier Kongs are far stronger than Yeti's, giving you rewards just a bit higher than Hunter Yeti's. Kongs give additional rewards and have a "state mission". This will give the entire state rewards. Killing rewards are given to the person giving the last blow. Glacier Kongs appear randomly. If you are going for the killing rewards, try starting three rallies at one time. You may need more rallies to kill higher level Kongs.

Arctic Dual Store

Purchase Items like Orange Skill Books, Badges, Snow Balls and Universal Orange Fragments with Frost Cores or Ice Blooms. Remember to try and save your resources in the beginning for buildings.

Season Journey(BattlePass)

Season Journey is broken up into multiple weeks. Each week has a set of tasks that you need to perform to get the best rewards from them. Most rewards will happen just playing the game but pay attention to the tasks to get the best rewards. Playing daily also gives you the free track of rewards and/or purchase the Battle Pass for \$24.99 to get better rewards.

Wartime Investment

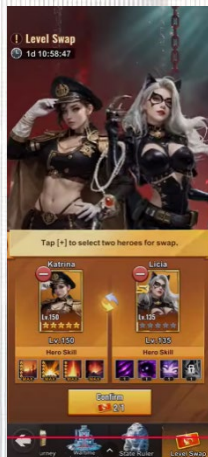

Can be purchased four times at \$9.99 each during the season. You can purchase this and claim the rewards all four times back-to-back. This will give us an advantage on Day One.

Hero Swap

Pro Tip #8: AvA tip: If you don't star up and swap a hero, you will get the skill books refunded. Star up and apply the skill books on hero days for points. You have to spend the frags anyways, why not get the skill books refunded and get the AvA points.

Hero Swap

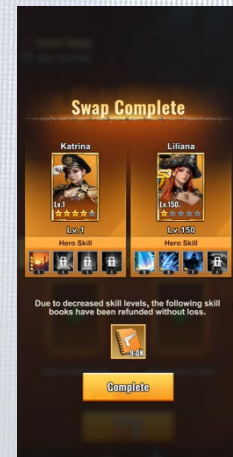

Locked Skills

Skill Swap

Completed Swap

The hero swap will allow you to swap levels and skill levels between two heroes. This will require a level swapper token. This will NOT swap stars upgraded with frags. It will also NOT automatically unlock any locked skill level. Only hero levels and skill levels are swapped based on star progression. It is best to upgrade the stars on the hero before performing a swap to get the maximum Skill Book swap benefits.

If the hero being swapped is of a higher skill level, the new hero skill will be maxed at the possible level and excess books will be refunded.

You can swap different tier heroes like A rank with S rank. But only their Level will be swapped, Skill and Stars will remain the same.

If you're unsure about upgrading or swapping S2 heroes, remember that S3 heroes fourth skill, when combined with S2 heroes, will add 7.5% damage resistance and at Star-5 will extend to all unit types and grants an extra 7.5% troop capacity.

Survivor Glory Rankings

Season Points Rankings

The screenshot shows the 'Season Points Rankings' screen. At the top, it says 'Fight for lands to earn Season Points' and 'Rewards'. Below this, there are tabs for 'Alliance Points' and 'Personal Glory'. The main table lists alliances with their ranking, name, and season points.

Ranking	Alliance Name	Season Points
1	#99 [WV]WAVE	26,634,140
2	#99 [WV]WAVE	26,634,140
3	#99 [WV]WAVE	26,634,140
4	#100 [WV]WAVE	26,634,140
5	#101 [WV]WAVE	26,634,140
6	#102 [WV]WAVE	26,634,140
7	#103 [WV]WAVE	26,634,140
8	#104 [WV]WAVE	26,634,140
9	#105 [WV]WAVE	26,634,140
10	#106 [WV]WAVE	26,634,140

Personal Glory Rank

Glory Chest

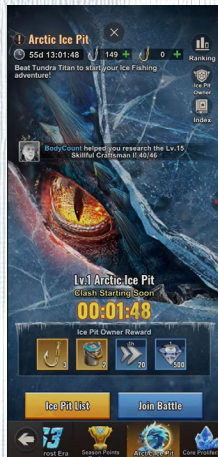

The screenshot shows the 'Glory Chest' screen. At the top, it says 'Glory Chest reward is available every 8 hours. Subscribe to the Season Journey to claim double rewards!'. Below this, there is a list of rewards. Each reward is represented by a row with a 'Glory' value, a 'Ranking' value, and a 'Claim' button.

Glory	Ranking	Claim
73200	113	4h ago Unclaimed
73200	113	12h ago Claimed
73200	113	20h ago Claimed
73200	113	1d ago Claimed
73200	113	1d ago Claimed
73200	113	1d ago Claimed

Personal Glory Points are accumulated by defeating NPC's on the map and are capped at 72,200 points. You will want to increase this as much as possible as it will increase the number of resources you acquire every 8 hours. Alliance Season Points are a combination of Personal Glory Points and points earned from Glory Wars.

Arctic Ice Pit

Picture of Arctic Ice Pit

Ice Pit List

Tundra Titan

When the event starts you must defeat the Tundra Titan to own the Ice Pit and to start Ice Fishing. This can easily be a 30-minute fight depending on how many of your alliance members show up to fight.

During the Arctic Ice Pit clash, contests for Level 1, 2 and 3 Ice Pits start on Monday, Wednesday, and Friday at 11AM APO respectively, each lasting up to 1 hour. There are 6 level 1s, 3 level 2s and one level 3. During the first week the event will be open to your server only. After the first week, when the event starts, you and the other servers in your grouping will be able to port into the pit area and attack the Titan. After the 1-hour event, you won't be able to port into the Pit area with your HQ again. You will, however, be able to fish all server group Pits.

While fighting the Titan, the alliance that does the most damage will win the Pit. The immediate area around the pit is a "red zone", think Mud at the capital. You can port your HQ there, but you will be attacked and looted. For those not wanting to be there, there will be a "frozen area" around the pit you can Teleport to. This will require a 25-30 second march, but better than being looted.

After you ported your HQ to the Pit area, you will start battling the Titan. The Titan has a large health bar. You WILL have injured and perished troops, so healing is important here. Use the batch healing method to heal troops and minimize speedups/diamonds. Use your main formations and make sure to get War Frenzy, the President buff and Rose ATK/DEF buff if available.

This fight is like the boss in Canyon clash. Multiple alliances can fight the Tuntra Titan, but the alliance with the most capture points will claim the pit. Any member attacking the Titan gets full rewards, so even one hit counts for rewards.

Fishing requires hooks. There are common(purple) hooks  3, Master(Gold) hooks  3, and Fishing Buckets  2 that instantly grant fish. One hook gives five fish. Fishing takes one minute for a common fishing pass(hook). You may select to use multiple hooks. When using multiple hooks, the gains and time are multiplied by one minute. So, five hooks equal a five minute queue and 25 fish. Gains are five fish per one minute. You will have to fish in different Pits to get all the fish in the Index. Presidents can agree to swap pits if they don't want to constantly battle over the Pit. This will need to be coordinated.

If you own the pit, you will get higher chances of a rare fish. You can use more than one fishhook at a time. Once you start fishing a queue and timer will appear. Once the timer is done click on the bucket to get your fish. The owner will also receive an envelope the next week that contains diamonds that can be shared with the alliance. If you own three pits, you will receive three envelopes.

Fishing grants a fish to complete your Index. Finishing the Index grants rewards like season resources, Badges, Frags and ultimately the season decoration (Zazz Snowman).

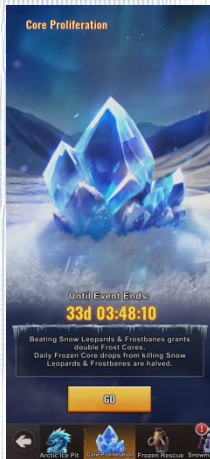

Once you get more than one of the same type of fish, you can share that fish with your alliance members or friends.

Fishing in your own Ice Pit grants better rewards and harder to catch fish.

After the first week or two of Ice Pits, you will be able to port to another state and fish in their Ice Pits. You can also attack/be attacked and looted which gives us/them extra resources during the week.

In the fish Index, you must click on the fish and select activate to get the reward.

Core Proliferation

This happens later in the season and grants double the amount of Frost Cores and Ice Blooms gained from Snow Leopards and Frostbanes. Where you received rewards from killing 30 NPC's, you now only get rewards for the first 15 kills. But this also means you will use less fuel and time for the same amount of resources gained.

Frozen Rescue

Frozen Rescue runs every week from Monday through Wednesday. Cold Snap appears randomly that allows you to rescue animals. You scout the animal to unfreeze it from the Cold Snap. There is a timer that starts when you do. If you co-op scout with others this greatly speeds up the timer. Once they are unfrozen, they can be hit 10 times each. You get 10 rescues per day so use them based on your resource needs. Once the cold snap ends, all animals will be frozen again so be quick. Share the coordinates within your alliance for faster rescues. To obtain the rewards from the unfrozen animals, just click on it.

Share coordinates with alliance members to benefit others. Prioritize Mammoths and Elk. Rewards will improve with Glory Rank so focus on getting your rank higher quickly.

There are four animals to rescue. Each give the following:

Fox's grant Orange Skill Books and Resources.

Elk's grant Badges.

Bore's grant diamonds.

Mammoth's grant Universal Equipment Fragments.

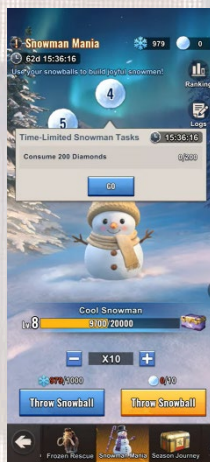

Most will go for Elk as it grants 300 Badges per Elk. Since you have 10 attempts every day that equals 3,000 badges daily. The event runs for three days, where you can get a total of 9,000 badges for the week.

Snowman Mania

Snowman Mania Screen

Snowman with task open

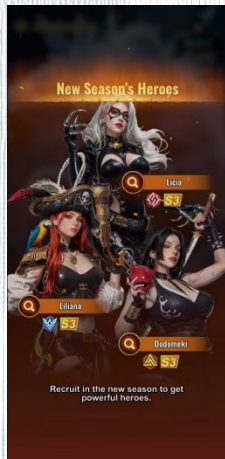

Zazz at level 5

Snowmen have 20 levels. At level 20 you're granted the Zazz Snowman decoration (+3% ATK/DEF). You will upgrade your Snowman with snowballs. Snowballs are earned by completing tasks, clearing Snow Leopards or stealing them from other players. You will be able to use Snowflakes to create Snowballs. It takes 100 Snowflakes to create a Snowball. These drop from Snow Leopards and Frostbanes. Sometimes there is a mid-season reset that allows you to gain more rewards by resetting your snowman.

Season 2/3 Heroes

Season 2/3 Heroes

3rd Skill

4th Skill

The new heroes are Licia (Blood Rose), Liliana (Wings of Dawn), and Dodomeki (Guardian). Their 3rd Skill increases troop capacity by 90 when deployed. Their 4th Skill when deployed with a S2 same faction hero grants 7.5% damage resistance and at 5-Star, bonus extends to all unit types and grants an extra 7.5% troop capacity boost. The 7.5% damage resistance unlocks at level 50 and at least 4 stars. If you haven't purchased the S2 heroes yet, get them and level them to get additional bonuses from the 4th skill.

Mastery

Pro Tip #9: Reset and use Support Mastery at the start of the season until your BioLab is Level 28, then switch to Military Mastery.

Mastery Lvl 10-20

Mastery Level 20-30

Mastery to level 35

The first level of Season Mastery is Architect's Insight (+30% EXP gains from Season Building upgrades) and Ice Bloom(+15% Ice Bloom Output) output. Next skip Free construction and you can take Siege Expert here if you need additional EXP. Next you will save XP to get to Building Support (+15% for 1 hour boost) and take Frost Core Refinement(+15% gain), Injury Relief(+50% serious to slight injuries), Shield Bond(1 hour shield for Alliance members), Resistance Boost(+5 additional points of Resistance), Swift Rally(+10% March Speed), Eco Recovery(+10% construction speed), and finally Vault Master.

Thank you for taking the time to read my guide and I hope that you have learned something through my time and research. Feel free to reach out to me on Server 261 and the 36C alliance. Good Luck and have fun!
